

Reporting Organisation

- Afghanistan Public Policy Research Organization (APPRO) (*Language: English*)

Organisation Identifier	AF-MOE-1212
Organisation Type	Academic, Training and Research

Activity Identifier

AF-MOE-1212-NAP-1325-Monitor

Title

NAP 1325 Monitor (*language: English*)

Description

General Description

NAP 1325 Monitor will carry out a full implementation analysis of Afghanistan's NAP 1325 over a period of four years consisting of robust monitoring, related in-depth research, evaluations, and training and mentoring to build capacity of government and civil society organizations to support the operationalization of NAP 1325 in Afghanistan. Expected Outcome NAP 1325 Monitor will contribute to good governance in gender-focused programming and policy implementation through informed and constructive engagement and advocacy by civil society aimed at local (provincial), national and international stakeholders. This includes a strong focus on multi-actor partnerships, notably the role of civil society at large and women's rights organizations in particular, to create linkages between society and its public institutions. These linkages are expected to result in government transparency, responsiveness, and accountability on its commitment to protect and promote women's basic rights, as articulated in NAP 1325. The key, multi-faceted, outcome of this program will be increased capacity and evidence-based responsiveness of public institutions to protection and promotion of women's rights in Afghanistan consistent with the requirements of UNSCR 1325, related Resolutions, and Afghanistan's NAP 1325. *(Language: English)*

Objectives Description

The specific objectives of NAP 1325 Monitor are to: 1. Establish baseline conditions based on the available information, particularly APPRO's own ongoing work on challenges faced by

women throughout Afghanistan, and report negative and positive changes for action and learning, respectively. The findings from ongoing monitoring are expected to feed into state-civil society interface on WPS objectives as outlined in Afghanistan's NAP 1325. Ongoing monitoring will compile an up-to-date evidence base for advocacy by women and their organizations and responsive action by the government. Monitoring will be carried out using a standardized methodology based on a comprehensive set of indicators developed from the United Nations Security Council Resolution 1325 (UNSCR 1325), subsequent related resolutions, and Afghanistan's NAP 1325.

2. Generate practical policy recommendations for interventions by civil society and the government on meeting WPS objectives as specified in UNSCR 1325 and Afghanistan's NAP 1325. APPRO will work with women-centered civil society organizations on evidence-based, constructive advocacy to engage state actors and with state actors on how to utilize evidence-based, constructive advocacy messaging for more inclusive, relevant, and effective policy making on WPS.

3. Disseminate information from the monitoring and related research to national audiences and international audiences through APPRO-Europe in Brussels and other international fora with a focus on Afghanistan and/or women's peace and security. This monitoring, research, and training program is also expected to prove useful in identifying entry points for the implementation of Sweden's own NAP 1325 and its implications for Swedish foreign policy and Sweden's development aid programming in

Afghanistan. *(Language: English)*
